

Rippatape®

Opening and reinforcing
your packaging

Rippatape® has delivered superior easy open performance to the fibre and corrugated board market for over 60 years. At Filtrona Tapes, we know consumer frustrations with difficult to open packaging can severely impact a purchasing decision. Using Rippatape® can improve consumer loyalty.

PRODUCT INFORMATION

EASY OPENING

Rippatape® products are designed to rip through most grades of fluting and board allowing quick, easy and safe access to contents.

This includes corrugated and fibreboard cartons, envelopes, paper sacks and E-commerce mailers.

Ask us for our Rippatape® range guide to learn more.

REINFORCEMENT

With no need for perforations, Rippatape® can enhance the strength of a pack.

It can also be used to reinforce areas, like handles, for added durability.

SUSTAINABILITY

Rippatape® is able to enter the recycling chain with the board it is used on.

We are committed to making our products more sustainable. Contact us to learn more.

EASY APPLICATION

Rippatape® uses a water-based, pressure-sensitive adhesive, bonding without the need for solvent, hot wax or heating units.

With our comprehensive range of applicator systems and support, you can deploy our tape with ease.

KEY BENEFITS

- No need for blades - Provides a safer means of opening corrugated and fibreboard boxes
- Quick access to contents speed up shelf stacking at retail level
- Enhance pack strength by reinforcing weaker areas of the box and eliminate the need for perforations
- No negative effects on board recyclability
- Engineered for use on higher recycled content board
- Quick and easy to apply on production lines
