

The perfect combination of easy opening and freshness

VakTape™ is an easy open solution specifically developed to provide a consistent and reliable combination of easy opening and hermetic seals on modified atmosphere packs and vacuum packs.

PRODUCT INFORMATION

EASY OPENING

VakTape™ has been designed as an easy-opening tear tape for hermetically sealed, airtight packaging. It offers a safe, hassle-free opening precluding the use of knives or scissors.

EASY APPLICATION

The heat activated adhesive ensures that VakTape™ adheres to packaging as it is applied to the film during the wrapping process.

This ensures a low-cost, in-line application maintaining pack integrity.

We offer application systems and support to ensure you can apply the solution with ease.

RELIABILITY

A consistent air-tight seal, crucial for product freshness and shelf life, is assured across retained atmospheres, modified atmospheres, vacuum and pouch packs and is unaffected by moisture and chilling.

TYPICAL APPLICATIONS

VakTape™ provides a vacuum tight seal for a wide variety of applications.

Typically used in the fresh food sector, it is becoming increasingly accepted across a variety of products, including medical devices, print cartridges, coffee, pet food and wet wipes.

KEY BENEFITS

- Safe and easy no blade opening without compromising strength and freshness
- Produced under strict hygiene conditions - complies with global food-contact regulations
- Suitable for vacuum packs and works reliably in moist and chill conditions
- Tape applicators can be easily integrated into new or existing production lines
